

yy\_stream\_unget

```
graph LR; A[yy_stream_unget] --> B[ungetc_with_restart]
```

A diagram showing a mapping from the function `yy_stream_unget` to `ungetc_with_restart`. The function name `yy_stream_unget` is contained within a gray rectangular box on the left. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the function name `ungetc_with_restart`. Both boxes have a black border.
